| AZNET  |  | MAC PRICING / UNIT TABLE |  |
|--|--|--------------------------|--|
| <b>NOTES:</b><br>1) Time & Materials (T&M). MAC Types marked as T&M are charged at the hourly rate shown above including travel time; except that for Zone A no travel time is charged; for Zone B only one way travel time is charged; and for Zones C and D two way travel time is charged. T&M hours are rounded to the nearest hour with a one hour minimum (e.g. if work takes 1 hour and 23 minutes, State is charged for 1 hour; if work takes 1 hour and 45 minutes, State is billed for 2 hours). Travel time initiates from the closer of the actual dispatch point or the closest Zone A city.<br>2) Trip Charges on standard MACs. MAC work in Zones C or D incurs a "Trip Charge" which can be "paid for" with an agency's allocation of MAC (see above TRPB). If two or more trips to one Zone C or D city can be combined, then only one trip charge will apply (the ticket with no trip charge will show an Activity Code of TRPN, free trip charge). If possible, Accenture will combine MAC trips for different agencies to the same Zone C or D cities. If this occurs, then the agency with the earliest MAC request is charged the Trip Charge, and the other tickets will show a free trip charge with activity code TRPN.<br>3) Any soft MACs completed on same seat as a hard MAC at the same time are counted as 1 hard MAC, i.e. each hard MAC includes any "soft MAC" work required to complete the hard MAC.<br>4) MAC Prices shown are prices for MACs in excess of the allocation for the State for both Standard and Non-Standard Hours.<br>5) MACs performed during Non-Standard hours are priced at 1.5 times the standard time charge. If an agency wishes to use their MAC allocation for Non-Standard Hours MACs they can do so, but each MAC uses the quantity of the MAC Allocation shown in the chart above on the right side.<br>6) Soft MAC and Hard MAC usage are counted separately, thus, each type count as ONE MAC although their dollar values are different.<br>7) Move vs. Delete & Add--For legacy phone switches, a Delete & Add is used rather than a Move if relocation is to a new site with a different phone switch. For IPT systems, a Delete & Add is used rather than a Move if relocation is to a new site with a different router.<br>8) Zones shall have the following meaning. Zone A means sites within 5 miles of the Capitol in Phoenix (the "Central Site" in Phoenix), or within 5 miles of 400 W. Congress (the "Central Site") in Tucson, or within 5 miles of a Central Site in Yuma and Flagstaff, which Central Sites in Yuma and Flagstaff shall be selected by ADOA General Services. Zone B means within 60 miles of the Central Sites of Phoenix, Tucson, Yuma, or Flagstaff (called Zone A cities). Zone C means within 100 miles of the Central Site of a Zone A city, and Zone D means outside 100 miles of the Central Site of a Zone A city. Central site addresses are as follows: Phoenix, the Capital, 1700 W WASHINGTON ST, PHOENIX, AZ 85007; Tucson, 400 W CONGRESS ST, TUCSON, AZ 85701; Flagstaff, 1100 W KAIBAB LN, FLAGSTAFF, AZ 86001; and Yuma, 7125 E JUAN SANCHEZ BLVD, SAN LUIS, AZ 85349 (ASPC-Yuma Prison). |  | <b>NOTES:</b>            |  |
